

As contract engineer to 'Pataphysical Broadcasting Foundation, Inc. ("Pataphysical"), Brant Herrett completed construction of the facilities detailed in this application in May 2016, but was not asked to file the covering license application before Pataphysical declared bankruptcy.

The constructed facilities differ from the facilities authorized by the outstanding construction permit (BPFT-20130917AFJ) in two respects: (1) The permit authorized an overall tower height of 30 meters. The actual overall tower height is 6 meters, including the top-mounted antenna. (2) The permit authorizes a 10 meter height of radiation center above ground level. The antenna is actually mounted at 6 meters above ground. Changes in these parameters are permitted under Section 74.1251(b)(3) and 7 (ii), respectively, without the need to file FCC Form 349.
