

TECHNICAL EXHIBIT
AMENDMENT TO
DTV DISPLACEMENT RELIEF APPLICATION
FCC FILE NO. BPTTL-JG0601WP
FACILITY ID 47722
TV TRANSLATOR STATION W69DC
ASHEVILLE, NORTH CAROLINA
CH 50(Z) 21 KW (MAX-DA)

Technical Narrative

This technical exhibit was prepared in support of an amendment to the pending DTV displacement application of W69DC on channel 50 at Asheville, North Carolina, FCC File No. BPTTL-JG0601WL. The purpose of this amendment is to demonstrate that the proposed W69DC operation will comply with the FCC's interference criteria.

Response to Paragraph 13(a) - TV Broadcast Analog Protection

A study has been conducted using the provisions of Section 74.705 which indicates that the W69DC proposal will not create prohibited interference to other existing, authorized or proposed NTSC full-power stations.

Response to Paragraph 13(b) - DTV Station Protection

Calculations based on OET Bulletin No. 69 indicate that the proposed W69DC operation on channel 50 complies with the FCC's 0.5% interference threshold criteria to all allotted, proposed or actual DTV operating facilities on channels 49, 50 and 51.¹ Figure 1 provides the output of study based on OET-69 Bulletin which demonstrates that the proposed W69DC operation complies with the FCC's DTV interference criteria.

Response to Paragraph 13(c) - LPTV/TV Translator Protection

A study has been conducted using the provisions of Section 74.707 which indicates that the W69DC proposal will not create prohibited interference to other existing, authorized or proposed LPTV/TV translator stations with the exception of the

¹ The du Treil, Lundin & Rackley, Inc. DTV interference analysis program is based on the program and procedures outlined by the FCC in the Sixth Report and Order; subsequent Memorandum Opinion and Order; and FCC OET Bulletin No. 69. A nominal grid size resolution of 2 km was employed. An Alpha based processor computer system was employed. The results have been found to be in very close agreement with the results of the FCC implementation of OET Bulletin No. 69.

licensed operations of W50AB on channel 50 at Hiawassee, GA (BLTT-20021204AAM) and W35AV on channel 35 at Black Mountain, NC (BLTT-19920323JI). However, based on consideration of terrain shielding and the provisions of the OET-69 Bulletin as permitted by FCC rules [Section 74.707(e)], it is believed that W69DC's operation complies with the FCC's interference criteria towards W50AB and W35AV. Specifically, calculations have been made using the procedures outlined in the FCC's OET-69 Bulletin and a 2 square kilometer grid. The interference calculations are summarized on Figure 1.
