

<p>ENVIRONMENTAL Statement WCCO-TV aux 301-DT Application CBS Broadcasting Inc.. October 23, 2013</p>
--

An Environmental Assessment is not required, as grant of this application would not be considered a major environmental action.

The proposed transmitting antenna will be mounted on a tower that has been registered with the Commission (ASR# 1023883). No change is proposed in the overall height of the tower above sea level.

The proposed auxiliary transmitting facilities will be shared with station KSTP-DT, that is filing a separate application to share the proposed antenna for an auxiliary. Both stations will utilize an existing combining system and will comply with the FCC guidelines limiting human exposure to radio frequency energy. The maximum power density at ground level with both stations operating into the proposed auxiliary antenna, calculated in accordance with OET Bulletin No. 65 (August 1997), will be less than 5% of the un-controlled applicable limit for exposures of un-limited duration at all locations on the ground.

If work is done on the tower in an area where over exposure could occur, the Licensee in coordination with the other users will take necessary action to prevent the overexposure of workers on the tower including reducing the transmitting power or ceasing operation completely.
