EXHIBIT A

One -Step Upgrade with Change of Channel in Another Community

This application seeks to upgrade WNRJ, Channel 291A, Poquoson, Virginia to Channel 291B1, with no change in the community of license. In order to upgrade, it is necessary to substitute Channel 245A for Channel 290A at Nassawadox, Virginia, based on procedures as outlined in *Revision of Procedures, 21 FCC Rcd 14212 (2006)*. CBL herein reviews the proposed change of channel and upgrade and shows why it is in compliance with the Commission's rules/procedures.

As indicated on Exhibit A1, at the proposed allocation/application site at Poquoson, Virginia, Channel 291B1 meets the Commission's minimum distance separation requirements to all other licensed, applied for, or proposed facilities pursuant to §73.207, with the exception of the licensed transmitter site for WRDU, Channel 291C0, Wilson, North Carolina and the pending application for a new FM station on Channel 290A, at Nassawadox, Virginia. WRDU was ordered to Channel 291C0 at Knightdale, North Carolina in MB Docket #05-121 and has an outstanding permit to implement new service at Knightdale, North Carolina. As such, WRDU's licensed site is operating under an implied STA, pending activation of the modified WRDU

facility. As such, CBL understands that the herein requested upgrade cannot be implemented (under program test) until program tests of WRDU commence at Knightdale, North Carolina. As such, it is believed that WRDU is not an impediment to the herein requested upgrade.

The proposed upgrade at Poquoson, Virginia is, however, mutually exclusive with the pending application filed by Hispanic Target Media, Inc. ("HTM"), the auction winner for Channel 290A at Nassawadox, Virginia. As such, CBL respectfully requests that Channel 245A be substituted for Channel 290A at Nassawadox, Virginia; HTM be directed to amend its application to specify operation on the new channel; and the Commission issue an Order to Show Cause or other instrument seeking the change on channels at Nassawadox. As indicated on Exhibit A2, Channel 245A meets the Commission's minimum distance separation requirements to all licensed, applied for, or proposed facilities, based on the site currently specified in BNPH-20050103ABV. Further, CBL is aware that HTM is contemplating a change in site in order to obtain clearance from the Federal Aviation Administration. Based on the coordinates proposed in the FAA clearance, Exhibit A3 shows that Channel 245A meets the FCC spacing requirements from this location, as well. Attached as Exhibit A4 is a map showing that a 70 dBu contour from either site will be delivered over Nassawadox, Virginia.

Therefore, CBL requests the following changes:

Poquoson, Virginia

Present	Proposed
291A	291B1

Nassawadox, Virginia

Present
290A

Proposed
245A

As the proposed WNRJ as a Class B1 facility will be implemented at the licensed site, there are no coverage losses. However, the proposed upgrade of WNRJ will allow the station to provide 60 dBu service to 1,301,208 persons in 4,783.7 square kilometers. This reflects an increase of 502,857 persons in 2,282.7 square kilometers over its present licensed facility.¹ Further, the change of channels at Nassawadox, Virginia will be implemented at the applicant's proposed site and no gain or loss areas will occur.

Based on the foregoing, the proposed upgrade with corresponding change of channels at Nassawadox, Virginia complies with the Commission's rules and regulations.

1) The present licensed WNRJ facility provides a 60 dBu service to 798,351 persons in 2,501.0 square kilometers.

Note 1 : WRDU was ordered to Knightdale, North Carolina in MB Docket #05-121 and has a permit to implement service at Knightdale. Therefore, as WRDU is operating under an implied STA at its licensed site, it is not considered an impediment to the upgrade.

Note 2 : As part of this proposed upgrade for WNRJ, it is requested that Channel 245A be substituted for Channel 290A at Poquoson, Virginia. On Channel 245A there are no spacing issues with respect to the Hispanic Target Media, Inc., application.
