

Compliance with 47 C.F.R. 73.207

The proposed facility meets all minimum distance separation requirements with regard to co-channel, first, second, or third adjacent channel stations, and those separated by 53/54 channels, except the license of KPLZ Channel 268C Seattle, Washington (FIN 21663). The proposed facility is 3.1 kilometers short-spaced to KPLZ.

This application proposes contour protection for KPLZ according to the guidelines of 47 C.F.R. 73.215. Section 47 C.F.R. 73.215(e) states that the minimum separation requirement between a class C and a class A facility, which are separated by 200 kHz, is 142 km. Exhibit 27-A shows that KPLZ is separated from the proposed facility by 161.9 km.

Therefore, the proposed facility is permitted to use contour protection toward the short-space facilities (See Exhibit 31 for compliance with contour protection requirements).
