Re: Directional antenna for WJFK Radio located in Merrifield, Virginia.

I, William E. Ramsey, a duly licensed Land surveyor in the Commonwealth of Virginia do hereby certify that the directional antenna for WJFK Radio located in Merrifield, Virginia is oriented along a 220 degree azimuth.

The measurement technique used in determining the azimuth was utilizing GPS control stations. The adjustment to the proper azimuth was performed using an optical transit turning the proper deflection angle to the antenna. The expected accuracy of this method is +/-10 minutes of angular error.

William E. Ramsey
