Re: KUDE (FM), Nephi, Utah
Facility Identification Number: 72769
SLC Divestiture Trust I
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed May 24, 2012, on behalf of SLC Divestiture Trust I ("SLC"). SLC requests further extension of the special temporary authority ("STA") granted on January 11, 2008, to operate Station KUDE with emergency antenna facilities pursuant to Section 73.1680¹. In support of the request, SLC states that it has entered into a new lease at its licensed site and has just purchased the necessary equipment to rebuild the facility. SLC states that it is waiting for improved weather conditions in order to begin the reconstruction work.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee made substantial progress toward restoring licensed operation; thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KUDE may continue to operate with the following facilities:

¹ KUDE is licensed for operation on Channel 280C (103.9 MHz) with effective radiated power of 74 kilowatts (H only) and antenna height above average terrain of 684 meters.

Geographic coordinates:	40° 16' 58" N, 111° 56' 11" W (NAD 1927)
Channel	280 (103.9 MHz)
Effective radiated power:	0.2 kilowatt (Max-DA, H&V)
Antenna	Nicom, model BKY3P, directional
Antenna orientation	95° True
Antenna height:	
above ground:	24 meters
above mean sea level:	2347 meters
ASRN ²	1251577

SLC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 24, 2012**.

Sincerely,

Charles N. Miller, Engineer
