Re: Azimuth of antenna on Cheyenne Mountain

Dear Mr. Bruneau

Yesterday, we observed the "as built" installation of the Type 6810 Antenna (6 bay) as shown on the plans by Shively Labs (drawing No. 87897). These plans show an azimuth of 120° True.

Our field crew occupied previously established control points and measured the direction of the antenna using the horizontal parasitic assembly. We find the azimuth to be 120° True based on a solar observation previously measured. If you have any questions, or need any further information, please let me know.

Very truly yours,

BERGE-BREWER & ASSOCIATES, INC.

Chris Brewer, PLS.
Vice-president
