This statement supports an application by Meredith Corporation licensee of K51EH a low-power television station licensed to serve The Dalles, Oregon.

The applicant is proposing to “flash-cut” the operation of K51EH from analog to digital.

The proposed digital protected coverage contour overlaps that of the current analog facility. An analysis was performed using the methodology stated in OET-69 using same software (tv\_process\_dlptv\_pt) utilized by the Commission for analyzing interference into current users and pending applicants and, therefore, should yield similar results.

The results of that analysis indicate the proposed facility is in compliance with 47 C.F.R. Sections 74.709, 74.793(e), 74.793(f), 74.793(g), 74.793(h), 74.794(b) and 73.1030.
