**CH 241B - 96.1 MHZ - 23.0 KW**  
**EXMORE, VIRGINIA**  
**June 2004**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Sinclair Telecable, Inc. ("STI"), licensee of radio station WROX-FM, Channel 241B, Cape Charles, Virginia. STI has a pending license application before the Commission (BLH-20040317ABS). This license application was to cover the outstanding WROX-FM construction permit, BPH-20031202AAU, which authorizes a change in community of license to Exmore, Virginia. STI herein proposes to amend the application to reflect the replacement of the transmit antenna (a Shively Labs antenna in lieu of an ERI antenna). No other changes are proposed. Attached as Exhibit A is a calculation of the transmitter output power for WROX-FM.

The initial WROX-FM construction permit had two operating conditions. The first condition relates to the reduction in power of the facility for those persons having access to the site with regard to radio frequency radiation levels at the site. STI herein restates that it will reduce the power of the WROX-FM facilities to ensure that persons having access to the site will not be exposed to radio frequency radiation levels in excess of the rules. The final condition indicates that construction on the facilities authorized in BPH-20031202AAU is conditioned on the final outcome of MM Docket #02-76 and that construction is at the sole risk of the permittee.<sup>1</sup> Therefore, STI continues to comply with the conditions on BPH-20031202AAU.

---

1) Since no actual construction was needed to implement this change in community, STI can easily revert WROX-FM to its Cape Charles city of license, although it is unlikely this will be necessary.
