

# The Calvary Radio Network

*The Truth Heard in Black and White*

Affidavit Certification and  
Qualifications of Supervising Engineer

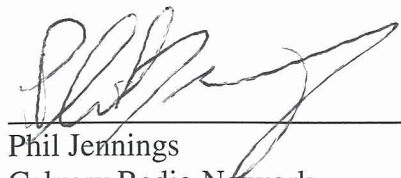

In Support of FCC Form 302-FM

WTPG Whitehouse, OH  
Permit BMPED-20110608AAR  
Facility ID# 122008

On this date, December 18, 2011, the proposed facility has been constructed as permitted in the construction permit BMPED-20110608AAR. I, Phil Jennings, am the Engineer for The Calvary Radio Network. I have been employed by The Calvary Radio Network, or a form of it, since June of 2001 when they were known as CSN International, in which I have been involved and supervised many full power and translator builds. The Calvary Radio Network oversaw the installation of this facility for Penfold Communications.

I certify that the directional antenna is constructed and installed to the exact specifications of the antenna manufacturer, Aldena, and in accordance with the Shively Labs WTPG Proof of Performance. The antenna configuration and orientation are specified in the Proof of Performance, and the antenna was installed according to said configuration and orientation. Furthermore, a professional surveyor Licensed by the State of Ohio confirmed the orientation of the antenna azimuth specified by the WTPG Proof of Performance.

I certify that the preceding is true and correct to the best of my knowledge and abilities as a broadcast engineer with The Calvary Radio Network. I am familiar with the FCC regulations regarding this construction permit.
