Sir,

I feel there is a problem with your application. In Section III, Question 8, you are showing a TOWER HEIGHT of 966 meters, or 3,170'. That is a very BIG tower.

You show FCC Tower Registration number of 1012220 on your application. The FCC antenna database information for this tower is:

Ground Elevation: 935m
Tower Height 30m
Max Height 37m

You should amend your application as follows:

Section III

Question 8 should be 37 meters
Question 9 should be 31 meters

Please amend this as soon as possible to keep your application from being returned due to the defect. This should also remove it from group M129. If you have any questions or need help with filing this amendment, please feel free to give me a call at (615) 826-0792.

Thanks
Rick Goetz
