

Engineering Statement

Educational Media Foundation requests a community of license change for WVRI from Pavo, GA to Nashville, GA.

This statement is included to show that the proposed community of license change to the current licensed station of WVRI Pavo, GA, will not leave any area underserved according to the guidelines of 307(b).

The current WVRI facility does not serve the community of Pavo, GA with an FCC F(50/50) 60dbu signal strength contour. Exhibit 23-A shows the relation between the current community of license and the requested community of license city of Nashville, GA. As can be seen, the currently authorized facility will provide adequate coverage to Nashville. This will bring the station into compliance with 73.315.

The proposed community of license change request does not include a transmitter move and WVRI will function as specified in its current license (BLED-20050804AAJ).

Since the transmitter properties will not change, the entire area within the contour of WVRI will remain the same thus no underserved area will be created or currently served area affected.

Respectfully submitted,

Cris Baron
