

TECHNICAL EXHIBIT
K28DV FLASH-CUT DISPLACEMENT
APPLICATION FOR CONSTRUCTION PERMIT
EVANSTON, WYOMING
CH 27 0.550 KW (MAX-DA)

Technical Exhibit

The technical exhibit supports an application for construction permit to "flash-cut" the K28DV analog facility to a digital facility and also displace to a new channel.

The displacement from Channel 28 to Channel 27 is due to the operation of nearby full-service station KSTU-DT on Channel 28 at Salt Lake City, Utah. The separation distance between KSTU-DT and K28DV is 134 kilometers.

Summary of Proposed Facilities

Below is a tabulation of the proposed digital facility:

Channel:	27
Geographic Coordinates:	41° 21' 06" North Latitude 110° 54' 20" West Longitude
Antenna Structure Registration:	N/A
Overall Tower Height:	16 meters
Ground Elevation:	2588 meters
Radiation Center:	2594 meters AMSL 6 meters (20 feet) AGL
Antenna Type:	Scala, 4DR-16S Narrow Cardioid (28.2 Power Gain)
Antenna Major Lobe Orientation:	190° True
Transmitter Power Output:	0.025 kilowatt (25 watts)
Emissions Mask:	Stringent
Maximum Effective Radiated Power:	0.550 kilowatt (550 watts)

Post-Transition Allocation Considerations

A study has been conducted to assure that the proposal will not create prohibited interference with other post-transition licensed, authorized or pending analog or digital TV, LPTV/translator and Class A TV stations. The allocation study is provided in Figure 2.

Radiofrequency Electromagnetic Field Exposure

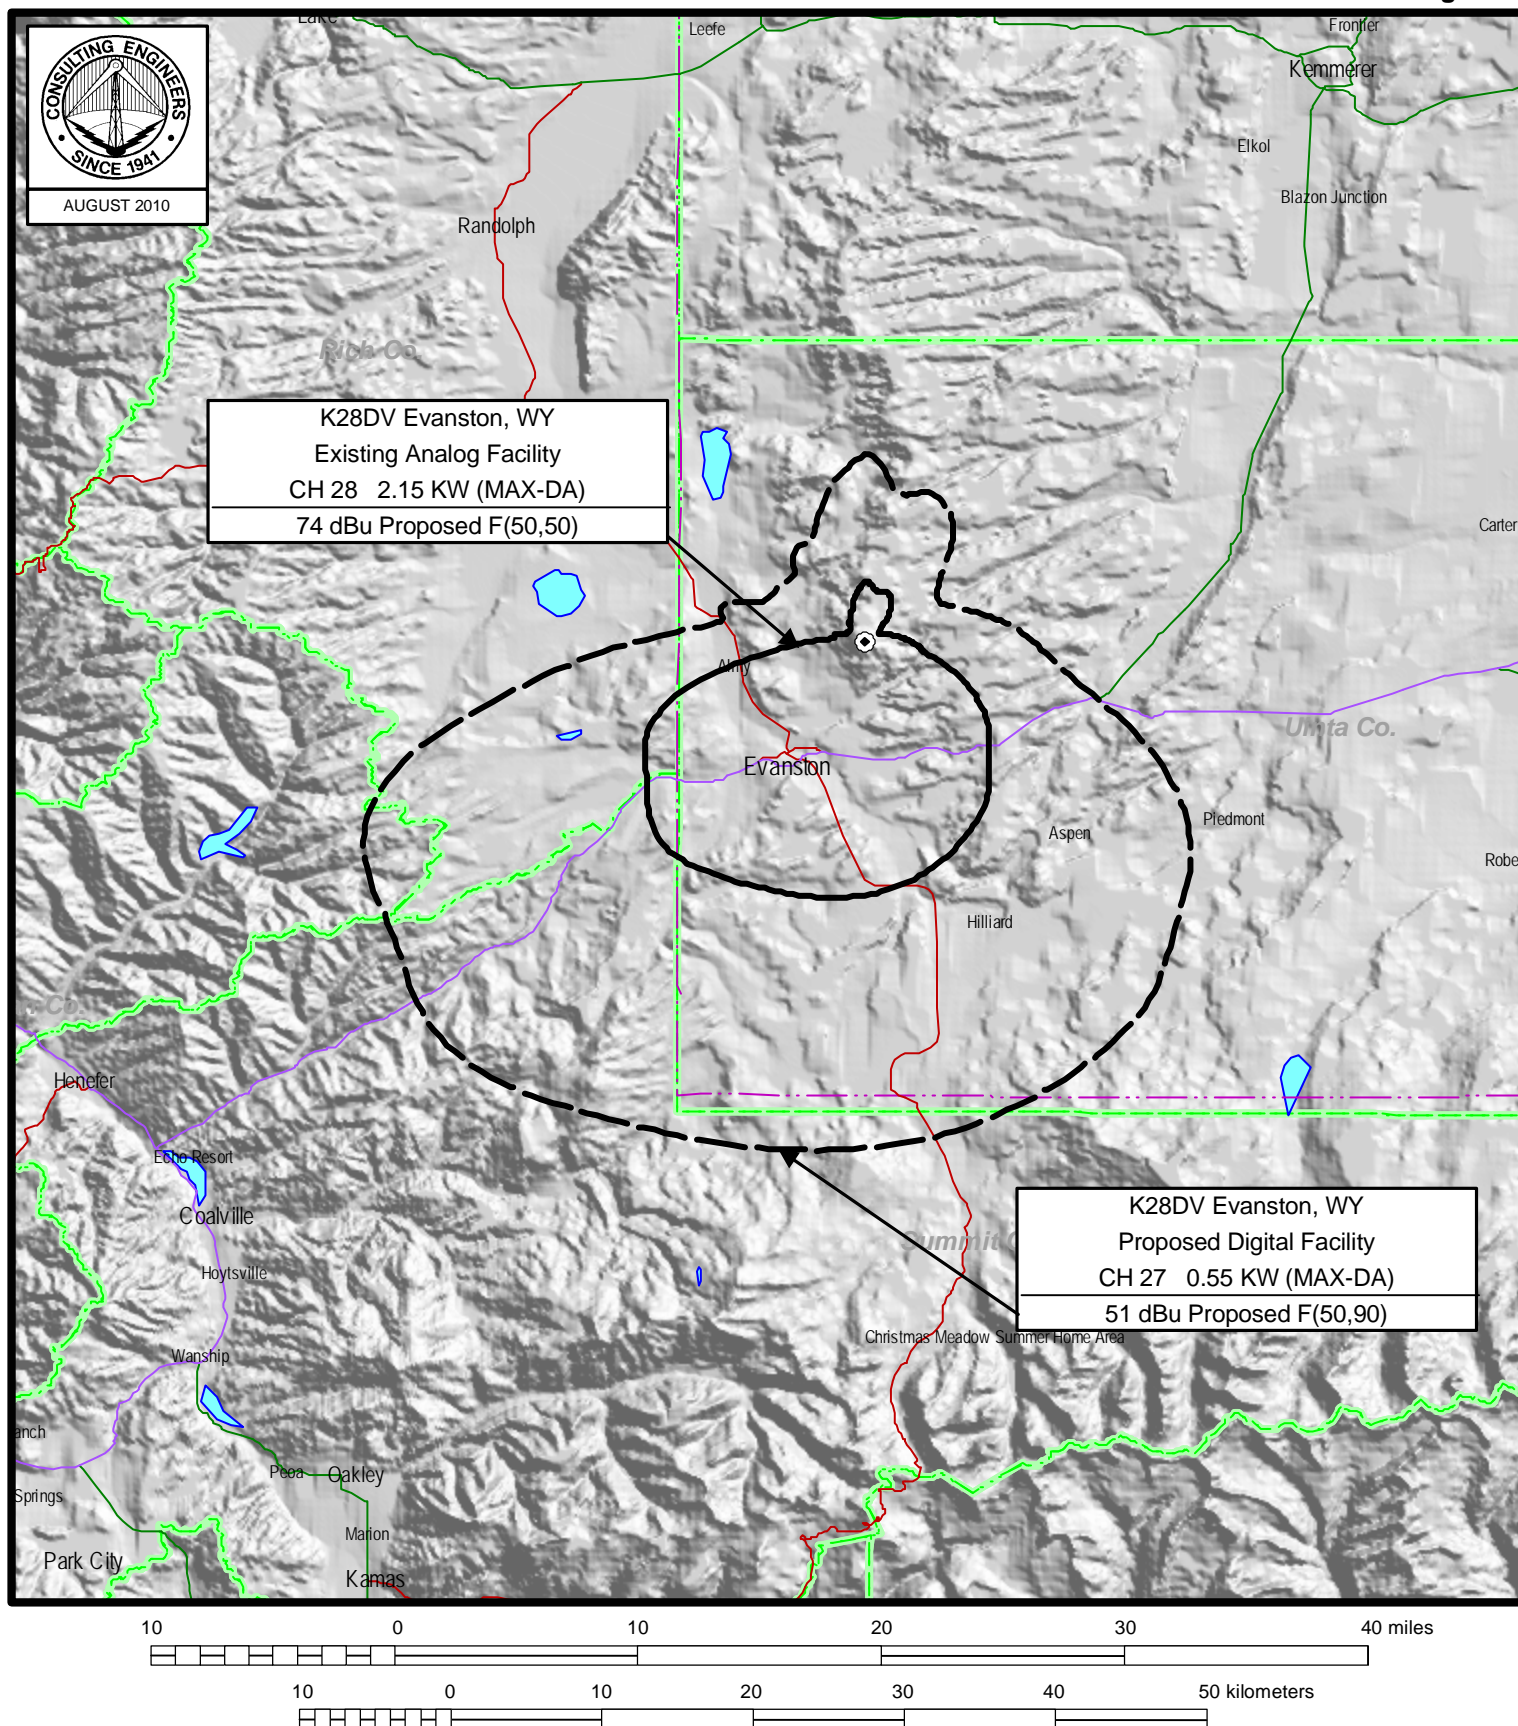

The proposed facilities were evaluated in terms of potential radio frequency (RF) energy exposure at ground level to workers and the general public. The radiation center for the antenna is located 6 meters above ground level. The proposed ERP is 0.55 kW. A conservative relative field value of 0.5 was assumed for the transmitting antenna's downward radiation. The calculated power density at ground level is 0.13 mW/cm². This is 35% of the FCC's recommended limit of 0.37 mW/cm² for channel 27 for an "uncontrolled" environment.

Access to the transmitting site will be restricted and appropriately marked with warning signs. In the event that workers or other authorized personnel enter restricted areas or climb the tower, appropriate measures will be taken to assure worker safety with respect to radio frequency radiation exposure.

It is noted that this statement only addresses the potential for radiofrequency electromagnetic field exposure. All other aspects of the environmental processing analysis will be or already have been provided to the FCC by the tower owner as part of the tower registration process.
