**Re:** Antenna Azimuth Certification  
WCEN Antennas  
Coleman, Michigan

Bruce:

Per your request, this letter is to confirm the Azimuth of the WCEN antenna's affixed on the tower located in Coleman, Michigan.

The results were determined by our survey field crew on October 25, 2004 and subsequently verified by our office personnel.

Our field survey crew used pre-set control points, established by Real Time Kinematic Global Positioning System (RTK-GPS), as a basis for their directional measurements.

The orientation of the WCEN antennas fell within the required tolerance per the manufacturer's specifications of the antenna's being pointed at an Azimuth of 65° based on True North.

Therefore, I hereby certify that the direction of the WCEN antenna's on the Coleman Tower are within the acceptable tolerance as set forth by the manufacturer from an Azimuth mark of 65°.

If you have any questions, please feel free to contact me

Sincerely,

SPICER GROUP INC.
