

WCPE-FM

Application for STA

Exhibit 1

We plan to replace all guy wires and upgrade the tower to the current standard, TIAA222G. This requires alternating transmission between the main antenna at 1,170 feet HAAT and the standby antenna at 670 feet HAAT and varying ERP between 10 watts and 100,000 watts.

We request Special Temporary Authority (STA) for a period from August 1, 2011 through October 30, 2011.

We request STA to operate in the following configurations:

Main transmitter)		(Main antenna
Or)	To	(Or
Auxiliary transmitter)		(Auxiliary antenna

We request STA to operate at varying ERP between 10 watts and 100,000 watts from either antenna.
