

INTERFERENCE ACCEPTANCE AGREEMENT

This Interference Acceptance Agreement ("Agreement") is entered into as of January 9, 2012 (the "Effective Date") by and among American Broadcasting Companies, Inc. ("ABC"), WBNG License, Inc. ("WBNG License"), United Communications Corporation ("United"), and Newport Television License, LLC ("Newport").

RECITALS

A. Each of the parties to this Agreement operates a digital television broadcast station on VHF channel 7 in the state of New York. Each party has received numerous complaints from viewers who have experienced difficulty receiving the signals of the parties' respective stations, as compared with the reception to which those viewers had been accustomed when the parties were operating with their former analog facilities.

B. The parties recognize that through mutual power increases, each of several co-channel stations can improve signal propagation without producing substantial amounts of mutually destructive interference. It is therefore anticipated that, by implementation of this Agreement, each party to this Agreement will improve service to the vast majority of viewers in its respective market by increasing signal strength, while causing only negligible amounts of interference to reception of other stations. Accordingly, the parties believe that this Agreement is in the public interest.

C. All interference percentages set forth below in this Agreement consider 2000 Census data as employed by the FCC's interference software in use at the time of this Agreement.

This Agreement shall be governed by the laws of the State of New York without giving effect to the choice of law provisions thereof. Notwithstanding any provision to the contrary, it is understood that the acceptance of interference levels agreed to herein shall continue to run with the station, not the licensee, and shall be binding on future successors or assigns (without the need for consent) in the event of an assignment of a station's license or a change in control of a licensee. This Agreement constitutes the entire agreement and understanding of the parties hereto and supersedes all prior agreements and understandings with respect to the subject matter hereof. Nothing in this Agreement expressed or implied is intended or shall be construed to give any rights to any person or entity other than the parties hereto and their respective successors and permitted assigns. This Agreement may be executed in one or more counterparts, each of which will be deemed an original, but all of which together will constitute one and the same instrument.
