

The applicant, Community Broadcast Group, Inc. (“CBG”), believes that it may certify “yes” to this question, but it is certifying “no” out of an abundance of caution. An application currently is pending for Commission consent to the assignment of the WMNT-CA license from CBG to Novia Communications, LLC (“Novia”) (File No. BALTTA-20141009AAD). Certain disgruntled shareholders of CBG filed a petition to deny and related pleadings with respect to that pending license assignment application. The pleadings did not raise any specific allegations regarding CBG’s character, and instead made only general and unsupported allegations that were wholly untrue. In opposition, CBG and Novia vehemently objected to those allegations. CBG and Novia expect the Commission to approve the pending license assignment application in the ordinary course. Thus, there is no reason why the Commission should delay its approval of this application.
