

COMPREHENSIVE ENGINEERING STATEMENT

prepared for

OTA Broadcasting (PIT), LLC

WWLM-CA Washington, PA

Channel 20 15 kW

OTA Broadcasting (PIT), LLC (“OTA”) is the licensee of Class A television station WWLM-CA, Channel 20-, Washington, PA, Facility ID 267 (file number BLTTL-19990413JC). OTA is hereby submitting a License to Cover the construction of the digital flash cut facility (File No. BDFCDTA-20081208AAK).

Antenna Replacement and Height Above Ground Change

The installed antenna is an Alive Telecommunications ATC-BPH8C2, horizontally polarized, instead of the Scala model 4DR-16-2HW, horizontally polarized, which was shown in the Construction Permit. The Alive Telecommunications antenna matches the horizontal and elevation patterns of the Scala antenna completely and was more readily available.

Additionally, due to mounting constraints on the tower, the antenna is actually mounted so that the center of radiation is at 65 meters AGL, rather than 68.5 meters. As this revised mounting height is less than 4 meters lower than that indicated in the CP, the installation complies with the Rules.

In all other aspects, the facility was constructed in compliance with all special operating conditions, terms, and obligations described in the construction permit.
