

REQUEST FOR EXPEDITED REVIEW AND NOTICE OF CONTEMPORANEOUS
REQUEST REGARDING LICENSING DEADLINE

TDS Broadcasting LLC (the “Applicant”), the licensee of Television Station KOHD, Bend, Oregon (the “Station”), hereby respectfully requests expedited review and action on the instant Application, in light of the public interest benefits of a voluntary relocation from Channel 51 to a different television channel (Channel 18), and in light of the upcoming deadline for spectrum protection during any incentive auction repacking. See, e.g., FCC File No. 0000001070 (permit granted for channel change for WLAJ-TV, Lansing, MI, within approximately two weeks).

To this latter point, being filed concurrently with this Application is a request to extend the Station’s opportunity to claim protection during the auction repacking process until at least June 29, 2015. Should the Commission approve this Application, the Station hopes to complete construction under this Application and submit the necessary license to cover application prior to that extended deadline. Accordingly, the Applicant requests that the Application is granted only if that contemporaneous request may be granted. For reference, a copy of that request is attached to this Application.
