

Details

The transmission line type for WACS-DT is "flexible", but no single component consists of 90% or more of the entire transmission system. The complete transmission line actually consists of three 250 foot sections plus one 290 foot section with EIA connectors.

Certification

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998. Mr. Godfrey was a graduate from the University of North Florida and a Distinguished Military Graduate from the University of Florida.
