

### Exhibit 1

The licensee currently has a construction permit on file (FCC File No. BPCDT-20120427ABI), which seeks to correct the station's ASR coordinates due to an incorrect NAD83/NAD27 conversion by the FAA. On May 29, 2015, the licensee filed an updated no-hazard determination with the FAA (2015-ANM-1739-OE). The request remains pending before the FAA. The licensee continues to await grant of the no-hazard study so that it can update the antenna structure registration with the new no-hazard determination and subsequently amend its pending construction permit to provide updated ASR information.
