

FCC Form 2100 Schedule 381 Pre-Auction Technical Certification
Exhibit A

Question 1(b): The license authorization and underlying technical data do not match the license application information with respect to the KAMR-TV antenna.

The underlying technical data reflect that the antenna is a Dielectric TUF-04-16/64H-1-T

The license for KAMR-TV states the antenna is a MCI, TUF-04-16/64H-1-T

The license application, submitted in File BLCDT-20080519ACZ states that the antenna is a MCI 95511016.

Documentation for all is attached.

The correct information is – as stated in the license application – MCI, 95511016.

In addition, the Max HAAT stated in the underlying technical data is 533 meters. This conflicts with the HAAT of 455.2 as stated in both the underlying technical data, license authorization and application for license.
