

Exhibit 1 to Pre-Auction Technical Certification for WBNF-CD Facility ID 14326

There is a discrepancy in the Database Technical Information for this station's antenna. The correct manufacturer is Jampro (JAM), and the correct model is JUHD-5/2(10).

The station's Engineering Data in CDBS, and Facility Technical Data in LMS both list the correct antenna.

The station's authorization, and TV Query both show the antenna as MCI-955316 – was corrected via letter from counsel prior to the current owner purchasing the station. It appears the correction did not result in a change to the formal authorization, or to TV Query.

The antenna pattern is identical, so there is no impact to the contour or other technical parameters of the station.
