Washington, DC 20554

RE: W50CH  
BDFCDTA-20111020AER

Liberty Communications, Inc. was granted Construction Permit File Number BDFCDTA-20111020AER, Facility ID 37238, on November 3, 2011. The W50CH digital facility was constructed as per this document with the exception of the following:

Special operating conditions or restrictions:

- i Prior to construction of the tower authorized herein, permittee shall notify AM Station(s) listed below so that, if necessary, the AM station(s) may determine operating power by the indirect method and request temporary authority from the Commission in Washington, D.C. to operate with parameters at variance in order to maintain monitoring point field strengths within authorized limits. Permittee shall be responsible for the installation and continued maintenance of detuning apparatus necessary to prevent adverse effects upon the radiation pattern of the AM station(s). Both prior to construction of the tower and subsequent to the installation of all appurtenances thereon, a partial proof of performance, as defined by Section 73.154(a) of the Commission's Rules, shall be conducted to establish that the AM array has not been adversely affected and, prior to or simultaneous with the filing of the application for license to cover this permit, the results submitted to the Commission. KFNS(AM)  
(Revised March 14, 1983)

The construction of the new digital facility required only a change in transmitter and associated audio feed equipment. No changes were made to the antenna, coax, tower, guy wires, tower detuning equipment, or any equipment outside. Therefore, it would be impossible to have changed any effect this tower installation has upon the KFNS AM facility. There were no changes to the monitoring points before or after the W50CH digital installation.

Liberty Communications, Inc. therefore requests that the W50CH digital facility license be granted given this information.

Sincerely,

---
