

Antenna Model Number

In preparing this application for license, Nexstar Broadcasting, Inc., the licensee of station WBGH-CA, determined that it had inadvertently entered the incorrect model number into the application for construction permit for digital flash-cut for the station. WBGH-CA operates on analog channel 20 (e.g., a UHF channel) and will operate its digital facilities on UHF channel 20 as well. However, the engineer inadvertently entered model number IX4KBBV rather than IX4KBBU. This was strictly a typographical error in the entry of the model number on the application construction permit. There is no change to the pattern of WBGH-CA's proposed digital operations as set forth in File No. 0000003254. Accordingly, Nexstar hereby requests that the Commission correct the antenna model number in the license to reflect IX4KBBU.
