KUED Ancillary Services Status for 2015

While we answered "NO" to the  question asking if we provided any ancillary services, KUED actually retransmits the WARN data as required by the Department of Homeland Security.   This data occupies less than .1 Mbs and does not generate any revenue.   In the past, KUED has been allowed to attach a supplemental file to form 317 with a list of all our licensed translators with a copy sent to Hossein Hashemzadeh.   The new LMS form does not allow us to submit a separate list if we answer "YES" to this question, so we have answered "NO" and are able to add the translators to the form itself.
