

KFXB-DT STA

Christian Television Network, Inc., licensee of KFXB-DT, hereby requests special temporary authority to allow KFXB-DT to operate at 50% of its licensed power. On December 23, 2015, the station was forced to reduce power due to a problem with a specific component near the antenna on the station's tower. Due to the current weather conditions and complexity, the necessary work to fix the component has not been performed. CTN respectfully requests this STA to allow it time to schedule a tower crew and wait for better weather to access the problem part.
