

**TRINITY CHRISTIAN CENTER OF
SANTA ANA, INC.
WMWC, GALESBURG, ILLINOIS**

NATURE OF OPERATION

On January 1, 2016, a piece of falling ice damaged the studio to transmitter link (STL) receive antenna at WMWC-TV, Galesburg, IL. The damage was so extensive that the station has not been able to transmit EAS information. The station has been diligently trying to repair its STL and transmit required EAS information, but the extreme cold and the necessity of having new parts fabricated, which have been ordered but not yet received, have delayed the time it will take to complete repairs. It is expected that the repair will be completed within the next thirty (30) days. In the interim, pursuant to Commission Rule 73.1635(a)(3)-(4), WMWC-TV respectfully requests STA to continue operating without being able to transmit EAS information otherwise required until completion of repairs to its STL, through March 1, 2016.
