

Radiation Statement  
Chico, CA Channel 1 LPTV  
April 21, 2016

The proposed facility is for 3,000 watts circularly polarized at 48.7 meter AGL. The radiation level below the antenna and around the facility is well within the Commission's uncontrolled exposure level. Nevertheless, placards warning of radiation hazard are posted in and around the site. Also, station personnel will be trained to reduce power or cease operation whenever anyone climbs the tower.
