

RF HAZARD STATEMENT  
APPLICATION FOR CONSTRUCTION PERMIT  
TELEVISION STATION KWHY-TV (AUXILIARY 2)  
LOS ANGELES, CALIFORNIA  
CHANNEL 42 420 KW (MAX-DA) 887 M

Upon completion of construction the licensee shall make proper radiofrequency (RF) electromagnetic field strength measurements throughout the transmitter site area to determine if there are any areas that exceed the FCC guidelines for human exposure to RF fields. If necessary, a fence shall be erected at such distances and in such a manner so as to prevent the exposure of humans to RF fields in excess of the FCC Guidelines (OET Bulletin No. 65, Edition 97-01, August 1997). The fence shall be of a type which will preclude casual or inadvertent access, and shall include warning signs at appropriate intervals which describe the nature of the hazard. Any locations within restricted areas that are found to exceed the recommended guidelines shall be clearly marked with appropriate visual warning signs.

The licensee, in coordination with other users of the site, shall reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from RF electromagnetic fields in excess of FCC guidelines.
