

Mountain Licenses, L.P. (“MLLP”), licensee of television translator station K44CK, Facility ID No. 58692, Chelan, Washington (“Station”), was granted special temporary authority to remain silent on November 17, 2015 (FCC File No. 0000004547). The station ceased operations on August 24, 2015.

On August 24, 2015, the translator site burned down as a result of a wildfire. For a series of reasons, including winter weather and safety, MLLP has not had access to the site since seeking the STA currently in place. The station’s transmitter site sits on a very steep mountaintop in the Washington State Cascade mountain range and is difficult to access in the best of conditions. MLLP has also been told by the relevant provider to expect substantial delays before electricity is restored to the damaged site. Given these developments, MLLP hereby requests authority to remain off the air for the maximum permissible length of time, to give it a sufficient opportunity to adapt to these new circumstances.
