

Environmental Statement

K03HY-D

June 22, 2016

The applicant proposes to operate at 3 kW circularly polarized 232 meters above ground. This proposal is well within the FCC's guidelines for radiation exposure. Nevertheless, the applicant will ensure that placards warning of radiation hazard are posted in and around the site at all times and that station staff are trained how to cease operation in the event that any tower maintenance is performed.
