

## No Significant Environmental Effect

The power density at 2 meters above the roof is less than the allowable level. See the attached sketch of the tower site and the calculation at the bottom of the page.

POWER DENSITY @ 2m ABOVE ROOF ( $\text{mw}/\text{cm}^2$ )  
 $= \frac{33.4 \times (.1)^2 \times .068}{(1)^2} = .0227 \text{ mw}/\text{cm}^2 < 1 \text{ mw}/\text{cm}^2$
