Re: W31BX-D, Danville, Illinois
Facility ID 70853
Section 73.1560(d) of the Rules
Notification of Reduced Power Operation

Dear Ms. Dortch:

This letter is to advise that W31BX-D, Danville, Illinois (Facility ID 70853) is operating at reduced power. This power reduction is due to a transmitter equipment failure. W31BX-D operates on an assigned Channel 31 with a maximum directional ERP of 3.08 kW and a radiation center above mean sea level of 241 meters.

W31BX-D is operating at approximately 50% (1.04 kW) of licensed power. The problem RF equipment has been sent back to the manufacturer for repair. This transmitter manufacturer is undergoing restructuring and this lends a degree of uncertainty to its successful repair and return into operation.

The W31BX-D technical staff has been in further contact with the transmitter manufacturer and is hopeful that this RF equipment will be returned soon.

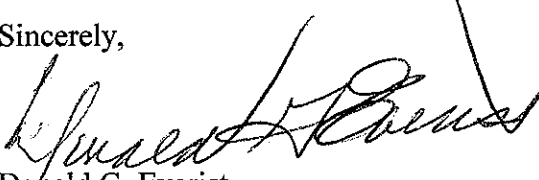

The FCC will be updated when the repair to the RF unit has been performed and has been installed and full power operation has been restored.

COHEN, DIPPELL AND EVERIST, P. C.

Ms. Marlene Dortch
