

Environmental Statement  
K031C=D Channel 3  
February 17, 2017

The applicant proposes to operate on channel 3 at 2500 watts at a height of 10 meters above the ground. The antenna used is a two bay CA-2/CP antenna which has reduced downward radiation. Also, the site is fenced with only controlled access. This proposal is well within the Commission's guidelines for both controlled and uncontrolled access. Nevertheless, the applicant will ensure that placards warning of radiation hazard are posted in and around the site at all times and that station staff are trained how to cease operation in the event that anyone climbs the tower.
