

Environmental Statement  
KQTA-LD  
February 20, 2017

The applicant proposes to use a CL-FM log periodic antenna array which by nature has very little downward radiation. The radiation is directed out away from the tower. Also, the facility is gated. This proposal is well within the FCC's guidelines for radiation exposure. Nevertheless, the applicant will ensure that placards warning of radiation hazard are posted in and around the site at all times and that station staff are trained how to cease operation in the event that any tower maintenance is performed. -
