

## Engineering Statement

KQRM-LP

March 7, 2017

The applicant, One Ministries, Inc (OMI), proposes to co-locate KQRM-LD with adjacent channel 3 (KCSO-LD) on the newly proposed tower for KCSO-LD. The applicant also has an existing interference waiver agreement with KCSO-LD . As an analog LPTV, this minor mod is acceptable under the FCC's rules, since there is contour overlap with the existing facility. KQRM-LD also has a digital companion channel (K03HY-D), for which K03HY-D is no longer needed. OMI will subsequently seek to directly flash cut KQRM-LD on channel 2 on this newly proposed tower. In the event that this minor mod requires that K03HY-D be deleted, then OMI hereby requests that the license for K03HY-D be terminated. No other stations besides those co-owned by OMI will receive any interference by this minor mod application.
