

## Attachment in Support of Requested Waiver Extension

This application continues the request originally approved in BSTA – 20110516APB and most recently approved in LMS 0000013961 to operate under a waiver of the rules with power in excess of the limit specified in the Commission's rules. The attachment exhibit documents the extraordinary circumstances justifying this request and continues to support this request for extension. Following the grant of the original STA and implementation of the power it authorized, hundreds of viewers were again able to view KCSO-LD off the-air and for the first time since the station transitioned to digital.

Surveys and data from off-the-air viewers show that the number of previous analog viewers reporting difficulty in receiving digital KCSO-LD's unique Spanish language programming has been reduced by two-thirds. While still very concerned over the viewers unable to receive the KCSO-LD signal, the improvement has been remarkable and there have been no complaints of interference.
