

Request for Special Temporary Authority

The School Board of Miami-Dade County, Florida (Licensee) requests authority to operate Station WLRN-TV, Miami, Florida with reduced power pending replacement of a transmitter tube. On or about May 23, 2017, one of the tubes in the WLRN-TV transmitter failed and, since that failure, the station has been operating at 67% of power. The station is in the process of obtaining a replacement tube, but there are no guarantees that such a tube will be available within the time limitations set out in 47 CFR Sect. 73.1560(d). Accordingly, Licensee requests special temporary authority to operate Station WLRN-TV at reduced power pending its receipt and installation of a new transmitter tube.
