

**STATEMENT OF JOHN E. HIDLE, P.E.
IN SUPPORT OF AN APPLICATION FOR
POST REPACK CONSTRUCTION PERMIT
WICD - CHAMPAIGN, ILLINOIS
DTV - CH. 32 - 715 kW - 396 m HAAT**

Prepared for: WICD LICENSEE, LLC

I am a Consulting Engineer, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission. I am a Licensed Professional Engineer in the Commonwealth of Virginia, License No. 7418, and in the State of New York, License No. 63418.

GENERAL

This office has been authorized by WICD LICENSEE, LLC, licensee of WICD, channel 41, facility ID number 25684, licensed to Champaign, Illinois, to prepare this statement, FCC Form 2100, Schedule A, its technical sections, and the associated exhibits in support of an application for construction permit, in accordance with the Incentive Auction Closing and Channel Reassignment Public Notice, DA 17-314, and the technical information provided in the confidential reassignment letter from the FCC announcing the substitution for DTV channel 41 with new DTV channel 32 to be used by WICD for its post-reassignment broadcasting.

**STATEMENT OF JOHN E. HIDLE, P.E.
WICD - Champaign, Illinois
PAGE 2**

DIRECTIONAL ANTENNA

The applicant proposes to install a new Dielectric model TFU-24JSC/VP-R 2C180 elliptically polarized directional transmitting antenna with its center of radiation located at a height above ground of 399 meters, and a height above average terrain of 396 meters. The antenna manufacturer's horizontal plane azimuth radiation pattern for the horizontally polarized component is shown and tabulated in exhibit 2. The manufacturer's horizontal plane azimuth pattern for the vertically polarized component is shown and tabulated in exhibit 3. The manufacturer's vertical plane elevation radiation pattern, illustrating the antenna's radiation characteristics above and below the horizontal plane is shown and tabulated in Exhibit 4.

The former channel 15 analog antenna will be removed from the tower structure and the new channel 32 antenna will be installed in its place, while maintaining the overall structure height of 609.3 meters Above Mean Sea Level (AMSL). (See ASR #1036562) Since the Height Above Average Terrain (HAAT) is to increase from 375 meters to 396 meters the applicant proposes a corresponding reduction in WICD's Effective Radiated Power (ERP) from 795 kW to 715 kW to maintain its coverage contour within the 1% expansion allowed.

PREDICTED COVERAGE CONTOURS

The predicted coverage contours were calculated in accordance with the method described in Section 73.625(b) of the Rules, utilizing the appropriate F(50,90) propagation curves (47 CFR Section 73.699, Figure 9), proposed Effective Radiated Power, and

**STATEMENT OF JOHN E. HIDLE, P.E.
WICD - Champaign, Illinois
PAGE 3**

antenna height above average terrain as determined for each profile radial. The average terrain on the eight cardinal radials from 3 kilometers to 16 kilometers from the site, was determined using the NED Three Second US Terrain Database as permitted in the FCC Rules. The antenna site elevation and coordinates were determined from FCC antenna registration data. Exhibit 1 shows the predicted Noise Limited (40.42 dBu) contour, and the principal community (48 dBu) contour. The 48 dBu contour completely encompasses the principal community of license, Champaign, Illinois.

ALLOCATION CONSIDERATIONS

Post-Transition DTV Considerations

A study was performed, using the FCC's software, tv_study, v. 2.2.2, to determine if the instant application for construction permit is predicted to cause new prohibited interference to post reassignment DTV stations, construction permits, DTV allotments or Class A DTV stations. The study results, shown in Appendix B, indicate that the instant application for construction permit is predicted to cause no new interference exceeding 0.5% to the populations served by any post reassignment DTV station, construction permit, allotment or Class A DTV stations. The study also shows that WICD's proposed service area is within the baseline plus 1%. (See Appendix B)

International DTV Considerations

The WICD site is located neither within the Canadian nor the Mexican coordination zone, Therefore no international considerations are necessary.

WICD - Champaign, Illinois
PAGE 4**

BLANKETING AND INTERMODULATION INTERFERENCE

Other broadcast and non-broadcast facilities are either co-located with, or located within 10 km of the proposed WICD site. The applicant does recognize its responsibility to remedy complaints of interference that might result from this proposal in accordance with applicable Rules.

RADIO FREQUENCY IMPACT

The FCC's guidelines and procedures for evaluating environmental effects of radio frequency (RF) emissions are generally based on recommendations by the National Council on Radiation Protection and Measurements (NCRP) in NCRP Report No. 86 (1986) and by the American National Standards Institute and the Institute of Electrical and Electronic Engineers, LLC (IEEE) in ANSI/IEEE C95.1-1992 (IEEE C95.1-1991). The guidelines define a maximum permissible exposure (MPE) level for occupational or "controlled" situations, and for "uncontrolled" environments that apply in all other cases that might affect the general public. The FCC Office of Engineering and Technology's technical bulletin No. 65 entitled, "Evaluating Compliance with FCC Guidelines for Human Exposure to Radio Frequency Electromagnetic Fields" (Edition 97-01, August 1997), provides assistance to determine whether FCC-regulated transmitting facilities, operations or devices comply with guidelines for human exposure to radio frequency electromagnetic fields as adopted by the Commission in 1996. OET Bulletin No. 65 contains the technical information necessary to evaluate compliance with the FCC's policies and guidelines.

The Maximum Permitted Exposure (MPE) level for broadcast facilities that operate

**STATEMENT OF JOHN E. HIDLE, P.E.
WICD - Champaign, Illinois
PAGE 5**

on a frequency between 30 MHZ and 300 MHZ is 200 microwatts per centimeter squared ($\mu\text{W}/\text{cm}^2$) for an "uncontrolled" environment, and is 1000 microwatts per centimeter squared ($\mu\text{W}/\text{cm}^2$) for a "controlled" environment. The MPE level for broadcast facilities that operate on a frequency between 300 MHZ and 1500 MHZ, primarily UHF TV stations, is determined, in $\mu\text{W}/\text{cm}^2$, for an "uncontrolled" environment by dividing the operating frequency in MHz by 1.500, and is similarly determined for a "controlled" environment by dividing the operating frequency in MHz by 0.300.

The predicted emissions of WICD must be considered, in addition to predicted emissions from any other proposed or existing stations at the site. For WICD, which will operate on television Channel 32 (578-584 MHZ), the MPE is 387.33 microwatts per centimeter squared ($\mu\text{W}/\text{cm}^2$) in an "uncontrolled" environment and 1,936.7 $\mu\text{W}/\text{cm}^2$ in a "controlled" environment. The proposed WICD facility will operate with a maximum ERP of 715 kW from an elliptically polarized directional transmitting antenna with a centerline height of 399 meters above ground level (AGL). Considering a predicted vertical plane relative field factor of 0.300 the WICD facility is predicted to produce a power density at two meters above ground level of 27.282 $\mu\text{W}/\text{cm}^2$, which is 7.04% of the FCC guideline value for an "uncontrolled" environment, and 1.408% of the FCC's guideline value for "controlled" environments. There are no other DTV, LPTV or FM broadcast facilities that are located at the WICD site. Therefore, the total estimated percentage of the ANSI value at the proposed site, including the cumulative radiation from all authorizations within the relevant proximity, is 7.04% of the limit applicable to "uncontrolled" environments, and 1.408% of the limit for "controlled" environments. (See Appendix A)

OCCUPATIONAL SAFETY

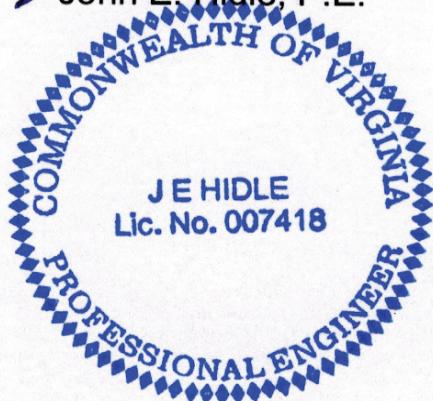

The licensee of WICD is committed to the protection of station personnel and/or tower contractors working in the vicinity of the WICD antenna, and is committed to reducing power or ceasing operation during times of maintenance of the transmission systems, when necessary, to ensure protection to personnel.

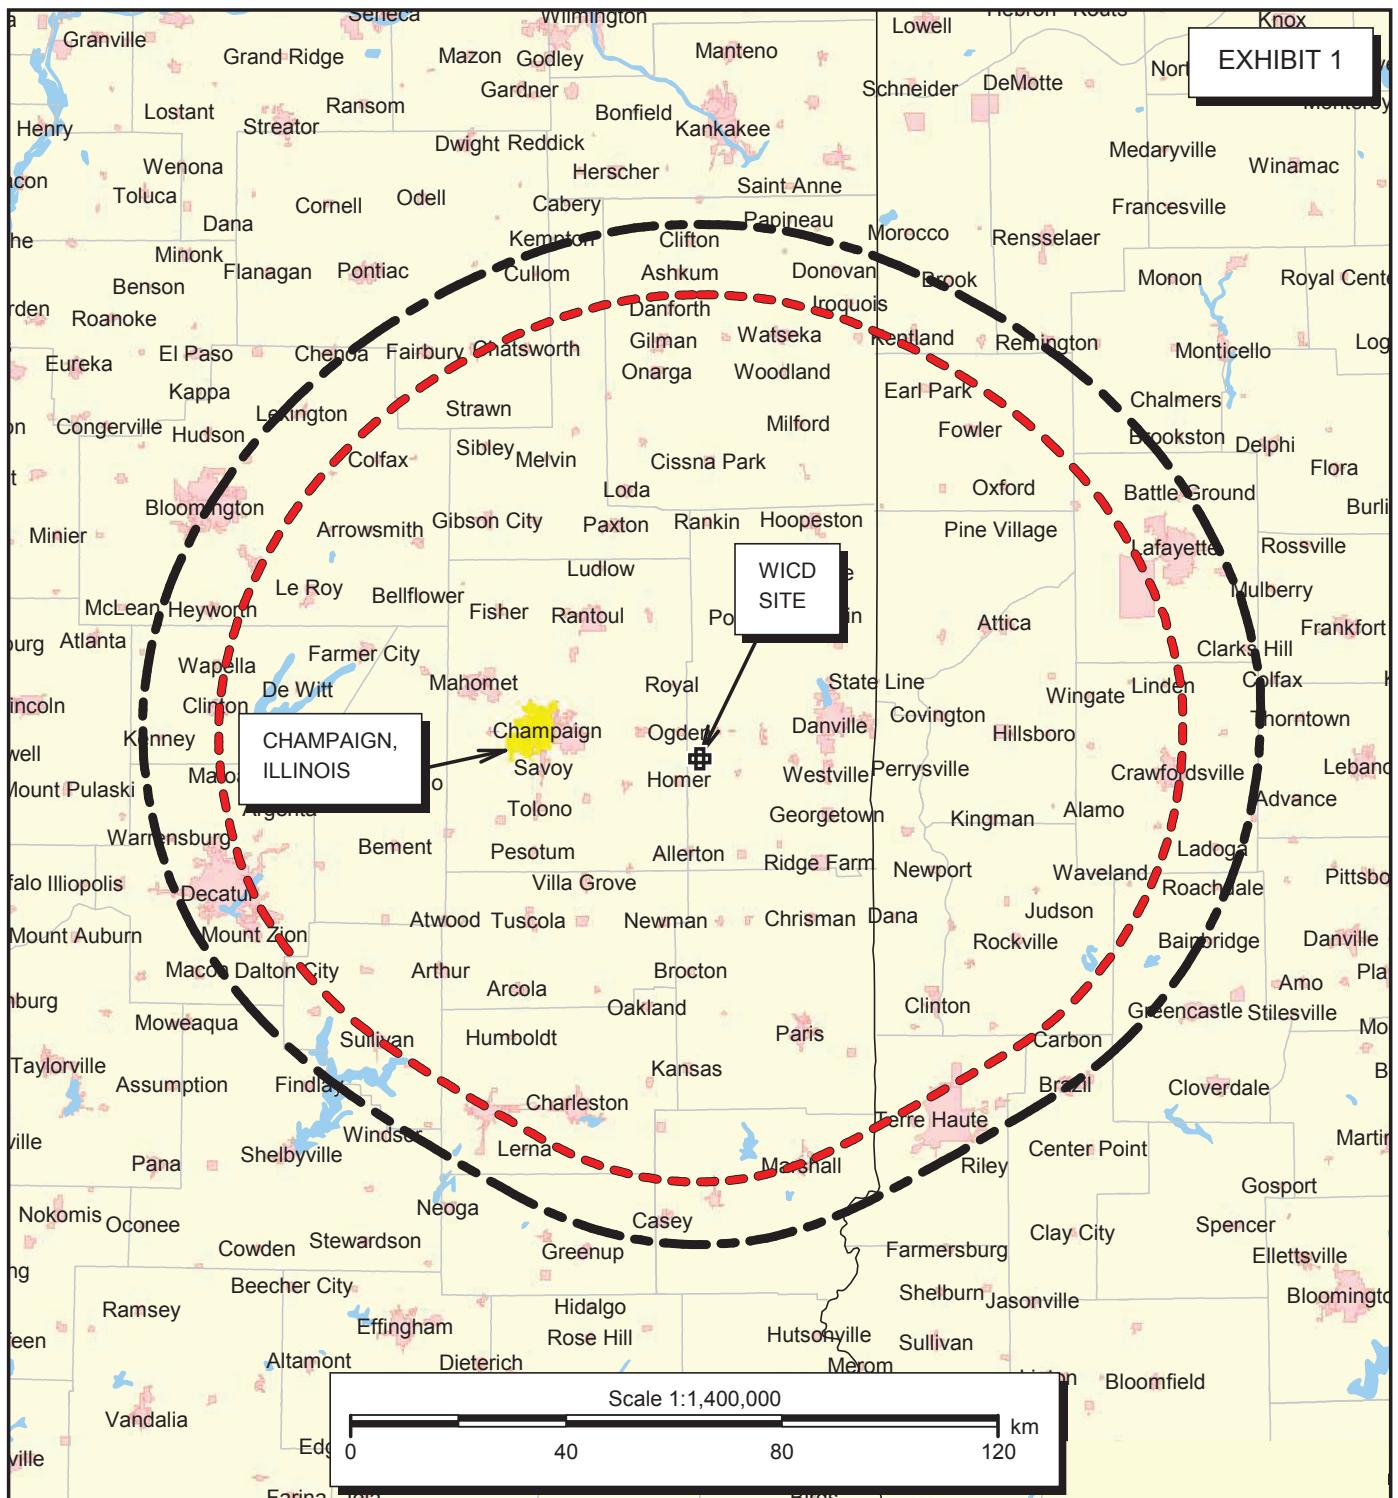

SUMMARY

It is submitted that the instant application for construction permit to change WICD from channel 41 to channel 32, as described herein, complies with the Rules, Regulations and relevant Policies of the Federal Communications Commission. This statement, FCC Form 2100, its technical sections, and the attached exhibits were prepared by me or under my direct supervision and are believed to be true and correct to the best of my knowledge and belief.

ELEVATION PATTERN

Proposal No. C-70033-1
 Date 15-Feb-17
 Call Letters WICD
 Frequency 581 MHz
 Channel 32
 Antenna Type TFU-24JSC/VP-R 2C180

RMS Directivity at Main Lobe

24.00 (13.80 dB)

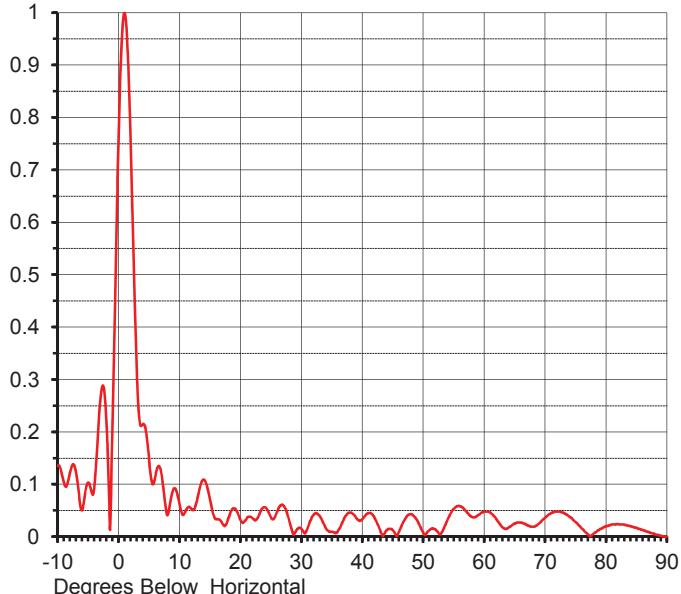

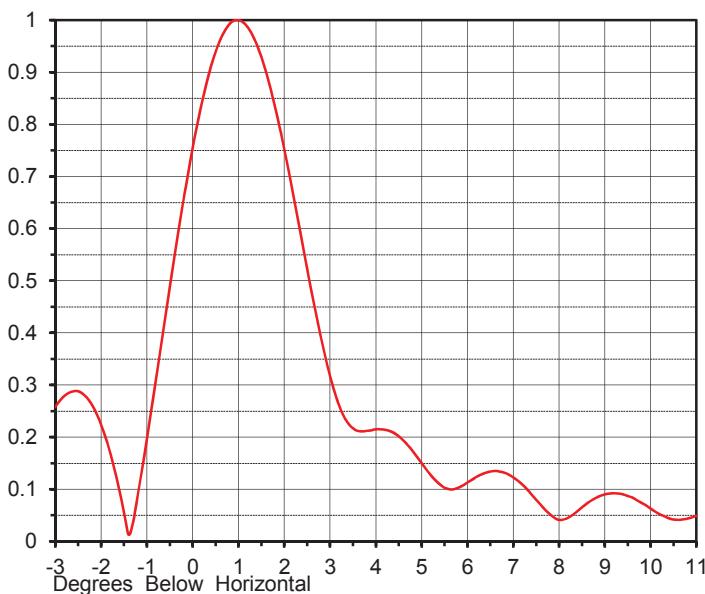

Beam Tilt 1.00 deg

RMS Directivity at Horizontal

13.70 (11.37 dB)

Drawing Number 24J240100

**SUMMARY OF RADIOFREQUENCY
RADIATION STUDY**
WICD, Champaign, IL
Channel 32, 715 kW, 396 m HAAT
June, 2017

<u>CALL</u>	<u>SERVICE</u>	<u>CHANNEL</u>	<u>FREQUENCY</u>	<u>POLARIZATION</u>	<u>ANTENNA HEIGHT</u>	<u>ERP (kW)</u>	<u>VERT. RELATIVE FIELD FACTOR*</u>	<u>WORST-CASE PREDICTED POWER DENSITY (μW/cm²)</u>	<u>FCC UNCONTROLLED LIMIT (μW/cm²)</u>	<u>PERCENT OF UNCONTROLLED LIMIT</u>
WICD	DT	32	581	H & V	399	715.000	0.300	27.282	387.33	7.04%

TOTAL PERCENTAGE OF FCC GUIDELINE VALUE = 7.04%

* For television stations a very conservative vertical relative field factor of 0.3 was assumed pursuant to OET Bulletin 65.

WICD - SPRINGFIELD, ILLINOIS Longley-Rice Interference Analysis

tvstudy v2.2.2
Database: localhost, Study: WICD_32_DIE_396H_715K, Model: Longley-Rice
Start: 2017.06.23 14:49:49

Study created: 2017.06.23 14:49:44

Study build station data: LMS TV 2017-06-21 (19)

Proposal: WICD D32 DT APP CHAMPAIGN, IL
File number: WICD_32_DIE_396H_715K
Facility ID: 25684
Station data: User record
Record ID: 699
Country: U.S.
Zone: I

Non-U.S. records included

Stations potentially affected:
