B. W. St. Clair

Engineering Statement Amendment

WVGN-LD FI 130029

The within application is a move from one registered structure to another about three miles distant. The contours have almost contiguous overlap. The application, when subjected to OET69 analysis, shows compliance with all pertinent sections of 24.793. NIER is less than 5% of the limit for its service.

Respectfully submitted,

B. W. St. Clair
Engineering Consultant
