

### Attributable Interests/Multiple Ownership Compliance

The instant application is an application for minor modification of license in order to implement the television channel repacking following the incentive auction. No change in attributable interests is proposed herein nor contemplated. Accordingly, the questions herein with regard to attributable interests in the licensee are irrelevant.

Moreover, while the parent company of WDEF-TV, Inc. holds attributable interests in other television stations, none of them are located in the same market as WDEF-TV, nor will there be any overlap between the signal contours of WDEF-TV and any other such station.
