

**STATEMENT OF JOHN E. HIDLE, P.E.
IN SUPPORT OF AN AMENDMENT
TO AN APPLICATION FOR
POST REPACK CONSTRUCTION PERMIT
FILE # 0000025689
WKEF - DAYTON, OHIO
DTV - CH. 34 - 747 kW - 351 m HAAT**

Prepared for: WKEF LICENSEE L.P.

I am a Consulting Engineer, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission. I am a Licensed Professional Engineer in the Commonwealth of Virginia, License No. 7418, and in the State of New York, License No. 63418.

GENERAL

This office has been authorized by WKEF LICENSEE L.P., licensee of WKEF, channel 18, facility ID number 73155, licensed to Dayton, Ohio, to prepare this statement, FCC Form 2100, Schedule A, its technical sections, and the associated exhibits in support of an amendment to an application for construction permit, in accordance with the Incentive Auction Closing and Channel Reassignment Public Notice, DA 17-314, and the technical information provided in the confidential reassignment letter from the FCC announcing the substitution of DTV channel 18 for DTV channel 34 to be used by WKEF for its post-reassignment broadcasting. The instant amendment corrects a typographical error in the relative field section of Form 2100, Schedule A.

**STATEMENT OF JOHN E. HIDLE, P.E.
WKEF - Dayton, Ohio
PAGE 2**

DIRECTIONAL ANTENNA

The applicant proposes to install a new Dielectric model TFU-24GTH/VP-R 6T140 elliptically polarized directional transmitting antenna with its center of radiation located at a height above ground of 343 meters, and a height above average terrain of 351 meters. The antenna manufacturer's directional horizontal plane azimuth radiation pattern for the horizontally polarized component is shown and tabulated in exhibit 2. The manufacturer's horizontal plane azimuth pattern for the vertically polarized component is shown and tabulated in exhibit 3. The manufacturer's vertical plane elevation radiation pattern, illustrating the antenna's radiation characteristics above and below the horizontal plane is shown and tabulated in Exhibit 4.

PREDICTED COVERAGE CONTOURS

The predicted coverage contours were calculated in accordance with the method described in Section 73.625(b) of the Rules, utilizing the appropriate F(50,90) propagation curves (47 CFR Section 73.699, Figure 9), proposed Effective Radiated Power, and antenna height above average terrain as determined for each profile radial. The average terrain on the eight cardinal radials from 3 kilometers to 16 kilometers from the site, was determined using the NED Three Second US Terrain Database as permitted in the FCC Rules. The antenna site elevation and coordinates were determined from FCC antenna registration data. Exhibit 1 shows the predicted Noise Limited (40.68 dBu) contour, and the principal community (48 dBu) contour. The 48 dBu contour completely encompasses the principal community of license, Dayton, Ohio.

STATEMENT OF JOHN E. HIDLE, P.E.

PAGE 3

ALLOCATION CONSIDERATIONS

Post-Transition DTV Considerations

A new updated study was performed, using the FCC's software, tv_study, v. 2.2.2, to determine if the instant application for construction permit is predicted to cause new prohibited interference to post reassignment DTV stations, construction permits, DTV allotments or Class A DTV stations. The study results, shown in amended Appendix B, indicate that the instant application for construction permit is predicted to cause no new interference exceeding 0.5% to the populations served by any post reassignment DTV station, construction permit, allotment or Class A DTV stations. The study also shows that WKEF's proposed service area is within the baseline plus 1%.

International DTV Considerations

The WKEF site is located 254.4 kilometers from the nearest point on the US-Canadian border and more than 1,900 kilometers from the nearest point on the US-Mexican border. The new updated study also included Canadian facilities that are located within the coordination distance, however, none is predicted to be affected by the WKEF proposal. (See Appendix B)

BLANKETING AND INTERMODULATION INTERFERENCE

Other broadcast and non-broadcast facilities are either co-located with, or located within 10 km of the proposed WKEF site. The applicant does recognize its responsibility to remedy complaints of interference that might result from this proposal in accordance with applicable Rules.

STATEMENT OF JOHN E. HIDLE, P.E.

WKEF - Dayton, Ohio

PAGE 4

RADIO FREQUENCY IMPACT

The FCC's guidelines and procedures for evaluating environmental effects of radio frequency (RF) emissions are generally based on recommendations by the National Council on Radiation Protection and Measurements (NCRP) in NCRP Report No. 86 (1986) and by the American National Standards Institute and the Institute of Electrical and Electronic Engineers, LLC (IEEE) in ANSI/IEEE C95.1-1992 (IEEE C95.1-1991). The guidelines define a maximum permissible exposure (MPE) level for occupational or "controlled" situations, and for "uncontrolled" environments that apply in all other cases that might affect the general public. The FCC Office of Engineering and Technology's technical bulletin No. 65 entitled, "Evaluating Compliance with FCC Guidelines for Human Exposure to Radio Frequency Electromagnetic Fields" (Edition 97-01, August 1997), provides assistance to determine whether FCC-regulated transmitting facilities, operations or devices comply with guidelines for human exposure to radio frequency electromagnetic fields as adopted by the Commission in 1996. OET Bulletin No. 65 contains the technical information necessary to evaluate compliance with the FCC's policies and guidelines.

The Maximum Permitted Exposure (MPE) level for broadcast facilities that operate on a frequency between 30 MHZ and 300 MHZ is 200 microwatts per centimeter squared ($\mu\text{W}/\text{cm}^2$) for an "uncontrolled" environment, and is 1000 microwatts per centimeter squared ($\mu\text{W}/\text{cm}^2$) for a "controlled" environment. The MPE level for broadcast facilities that operate on a frequency between 300 MHZ and 1500 MHZ, primarily UHF TV stations, is determined for an "uncontrolled" environment by dividing the operating frequency in MHZ by 1.5, and is similarly determined for a "controlled" environment by dividing the operating

**STATEMENT OF JOHN E. HIDLE, P.E.
WKEF - Dayton, Ohio
PAGE 5**

frequency in MHZ by 0.3.

The predicted emissions of WKEF must be considered, in addition to predicted emissions from any other proposed or existing stations at the site. For WKEF, which will operate on television Channel 34 (590-596 MHZ), the MPE is 395.33 microwatts per centimeter squared ($\mu\text{W}/\text{cm}^2$) in an "uncontrolled" environment and 1,976.7 $\mu\text{W}/\text{cm}^2$ in a "controlled" environment. The proposed WKEF facility will operate with a maximum ERP of 747 kW from an elliptically polarized directional transmitting antenna with a centerline height of 343 meters above ground level (AGL). Considering a conservative predicted vertical plane relative field factor of 0.300 the WKEF facility is predicted to produce a power density at two meters above ground level of 38.633 $\mu\text{W}/\text{cm}^2$, which is 9.77% of the FCC guideline value for an "uncontrolled" environment, and 1.954% of the FCC's guideline value for "controlled" environments. There are two other full-power DTV facilities, two LPTV DTV facilities and one FM station that are located at the WKEF site. The total estimated percentage of the ANSI value at the proposed site, including the cumulative radiation from all authorizations located within the relevant proximity, is 26.29% of the limit applicable to "uncontrolled" environments, and 5.258% of the limit for "controlled" environments. (See Appendix A)

OCCUPATIONAL SAFETY

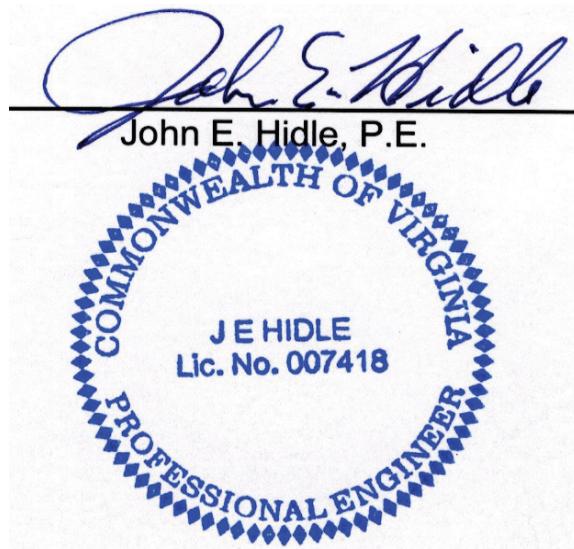

The licensee of WKEF is committed to the protection of station personnel and/or tower contractors working in the vicinity of the WKEF antenna, and is committed to reducing power or ceasing operation during times of maintenance of the transmission systems, when necessary, to ensure protection to personnel.

SUMMARY

It is submitted that the instant amendment to an application for construction permit to change WKEF from channel 18 to channel 34, as described herein, complies with the Rules, Regulations and relevant Policies of the Federal Communications Commission. This statement, FCC Form 2100, its technical sections, and the attached exhibits were prepared by me or under my direct supervision and are believed to be true and correct to the best of my knowledge and belief.

WRCX-LP	DT	40	629	H	280	0,320	0.300	0,012	419,33	0.00%
WKCD	FM	212	90.3	H & V	283	8,700	1.000	7,362	200,00	3.68%

TOTAL PERCENTAGE OF FCC GUIDELINE VALUE = 26.29%

* For television stations a very conservative vertical relative field factor of 0.3 was assumed pursuant to OET Bulletin 65.

WKEF - DAYTON, OHIO Amended Longley-Rice Interference Analysis

tvstudy v2.2.2
Database: localhost, Study: WKEF_34_351_747K_ANT, Model: Longley-Rice
Start: 2017.07.20 10:51:54

Study created: 2017.07.20 10:51:42

Study build station data: LMS TV 2017-06-21 (26)

Proposal: WKEF D34 DT APP DAYTON, OH
File number: WKEF_34_351_747K_ANT
Facility ID: 73155
Station data: User record
Record ID: 927
Country: U.S.
Zone: I

Non-U.S. records included

Stations potentially affected:

No non-directional AM stations found within 0.8 km

No directional AM stations found within 3.2 km

Record parameters as studied:

Channel: D34
Latitude: 39 43 28.00 N (NAD83)
Longitude: 84 15 18.00 W
Height AMSL: 616.1 m
HAAT: 351.0 m
Peak ERP: 747 kW
Antenna: DIE-TFU-24-GTH/VP-R 6T140 0.0 deg

40.7 dBu contour:

Azimuth	ERP	HAAT	Distance
0.0 deg	478 kW	354.3 m	96.4 km
45.0	710	379.2	101.8
90.0	358	346.6	93.4
135.0	627	347.2	98.1
180.0	585	355.2	98.2
225.0	377	380.4	96.5
270.0	738	345.4	99.3
315.0	441	326.0	93.1

**Amended Appendix B - Interference Analysis
WKEF - Dayton, Ohio
Channel 34 - 747 kW - Page 2**

Database HAAT does not agree with computed HAAT
Database HAAT: 351 m Computed HAAT: 354 m

Proposal service area is within baseline plus 1.0%
Proposal service area population is more than 95.0% of baseline

**Proposal is within coordination distance of Canadian border
Distance to Canadian border: 254.4 km

Distance to Mexican border: 1905.9 km

Conditions at FCC monitoring station: Allegan MI
Bearing: 336.6 degrees Distance: 350.4 km

Proposal is not within the West Virginia quiet zone area

Conditions at Table Mountain receiving zone:
Bearing: 278.3 degrees Distance: 1783.6 km

Study cell size: 2.00 km
Profile point spacing: 1.00 km

Maximum new IX to full-service and Class A: 0.50%
Maximum new IX to LPTV: 2.00%

Interference to DTVBL66536 BL, scenario 1
Proposal causes no interference.

Interference to DTVBL66536 BL, scenario 2
Proposal causes no interference.

Interference to DTVBL41458 BL, scenario 1
