

Extraordinary Circumstances

Station WFIB-LD, Key West, Florida, went off the air on September 10, 2017, as a result of power outage caused by Hurricane Irma. Because it is not yet known when power will be restored to the WFIB-LD transmitter site, or when WFIB-LD will thereafter be able to resume operations, special temporary authority for WFIB-LD to remain silent is requested. The Commission will be notified when WFIB-LD resumes operations.
