

T-Mobile has issued KJPO-LD a notification of its intention to commence operations of its 600 MHz spectrum in its broadcast area. An application is on file for issuance of a CP (File No. 0000029870). An STA to operate pursuant to the parameters specified in this pending application is requested.

This STA will allow service to commence on a new channel expeditiously.

Hello Mr. Alpert,

T-Mobile has issued your station a notification of our intention to commence operations of our 600 MHz spectrum in your broadcast area. Based on a review of the FCC's LMS data base it does not appear as if the necessary applications have been made by your station to secure an STA for a new channel. Please provide an update on your intentions and projected schedule for ceasing operations on your current channel by the deadline provided in our notification.

KJPO-LD

Please let me know if you have any questions,

Thank you,

John Carson
