Notification of Silent Status and Request for STA

On or around September 8, 2017, Hurricane Irma hit the U.S. Virgin Islands. As a result, WVXF(TV) is currently experiencing intermittent power. With the pending threat of Hurricane Maria, the licensee requests silent special temporary authority until the threat of storms in the Atlantic subsides and power can be restored at an uninterrupted level.

During the period of silence and variant power operations, the licensee has continued to provide its programming to most MVPDs via an IP connection (and will continue to do so provided it is technically capable of doing so).

The licensee will notify the Commission once operations are restored.
