

This application is being filed at the request of FCC staff, for the purpose of allowing ION Media San Jose License, Inc. ("ION"), to resolve the Unable to Construct status for KKPX-TV as set forth in its pending construction modification application which has been filed contemporaneously herewith. See File No. 0000029965 (requesting Channel 33 as its post-auction transition facility). As part of these contingent applications, ION's sister entity, ION Media Sacramento License, Inc., will file a contingent application to move its station KSPX-TV; Sacramento, California; FCC Facility ID No. 52953 ("KSPX") from Channel 22 to Channel 21 and Entravision Holdings, LLC will file a contingent application to move its station KDJT-CD; Monterey-Salinas, California; FCC Facility ID No. 52888 ("KDJT") from Channel 33 to Channel 26.

ION and KTXL have agreed in principle to the channel modifications being requested, and the parties intend to amend their respective modification applications with the agreement once executed. In the event, however, that a formal agreement is not entered into, KTXL reserves the right to withdraw this modification application and remain on its currently authorized Channel 33.
