

Attachment B

All necessary tower work has not yet been scheduled. As a government entity, San Bernardino Community College District ("District") must obtain formal Board of Trustees approval of the contract with a tower design and construction firm to design and construct the new tower. The District expects to obtain the necessary Board approval at the monthly Board meeting during the second week of December. At that time, the District will issue a notice to proceed to the tower design firm. All necessary tower construction work will not be completed until all required environmental approvals have been obtained.
