

ENGINEERING NARRATIVE
IN SUPPORT OF APPLICATION FOR MODIFICATION OF CONSTRUCTION PERMIT
FOR INCENTIVE AUCTION REASSIGNMENT CHANNEL
Prepared for
BEACH TV PROPERTIES, INC.
WAWD CH 25 Facility ID 54938 42 kW DA RC 78 M AMSL
FORT WALTON BEACH, FLORIDA
OCTOBER 2017

Summary

Beach TV Properties, Inc. ("BTVP") specifies herein its proposed maximized post-auction CH 25 transmission facilities. The proposed facility is based on continued operation from the licensed transmitter site which is also the replication site authorized in construction permit file number 0000027919. The tower carries FCC Registration number 1209534. The tower is 51.8 meters AGL with appurtenances. The proposed antenna is an elliptically polarized, slot type, with a horizontal plane radiation pattern equal to the replication pattern. This antenna replaces an existing horizontal only polarized, slot, antenna. At this site and RC AMSL of 77.9 meters the proposed ERP is 42 Kw as compared to the currently authorized 19.9 Kw ERP as specified in FCC file number 0000027919. The entire community boundary of Fort Walton Beach, Florida is located well inside the city grade contour.

Attached herein is the TVStudy version 2.2.3 output which demonstrates that the proposed facility will cause no new interference to any station and the proposed population is 108.2 percent of the baseline population.

Environmental

The proposed antenna system is a PSI model PSILPD16AH-25-CP, elliptically polarized, UHF, slot type, TV antenna. The radiation center is 46.8 meters above ground. Utilizing formula 10 OF OET Bulletin No. 65, Edition 97-01, a value F of 0.1 has been used to calculate the power density 2 meters above ground. The maximum power density is 8.73 microwatts/cm squared calculated for an ERP of 42,000 watts H. polarization and 10,500 watts V. polarization. This value is 2.4% of the General Population exposure per section 1.1310. Based on this analysis it is believed that the proposed facility follows OET-65 Guidelines.

The applicant will reduce power or cease transmission as required to meet FCC OET-65 Worker Safety Guidelines.

The proposed tower is an existing site with tower, building, access road and power.

TVSTUDY VERSION 2.2.3 Allocation Study Using LMS database dated 10/06/2017
